Bosch Home Appliances. Invented For Life.

Since its very inception, Bosch has been a brand that is relentless in the pursuit of providing quality products that are designed around the needs of consumers. Thus, the brand core of “Invented for Life” isn’t a motto and it isn’t a tagline, it’s the basis of how we approach innovation.

Our goal is to enhance the lives of our consumers through quality that’s perceivable by all of the senses; surprisingly simple solutions that lend ease to the kitchen, a design that’s modern and authentic, and perfect results that are the product of our tireless engineering standards. Bosch Home Appliances – invented for no other purpose than the life we live.

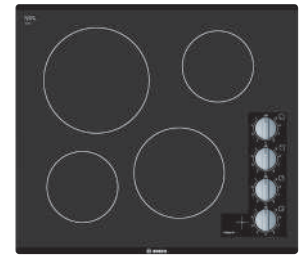

Bosch is committed to pure, purposeful European design that perfectly fits people’s lives. One of the current U.S. trends is small spaces. Popular in places like Manhattan, the movement is now catching on in more U.S. cities where small spaces are expanding to include guest suites, media rooms, secondary vacation homes and other ancillary spaces.

Bosch is satisfying this ever-growing lifestyle trend with modern design, innovation and efficiency you’d expect. As the 24" Bosch kitchen is specifically designed for small spaces, this is undeniable proof that a smaller space doesn’t mean a smaller sense of style. Whether it’s city dwellers living in an urban condo or loft, empty nesters or retirees desiring to downsize. Bosch brings a premium experience to any kitchen. No matter the size.

24" Cooktops

Available in gas or electric, Bosch 24" Cooktops are ideal for any small space kitchen. The Gas Cooktop includes an 11,500 BTU burner, two simmer burners and one medium burner, and stainless steel knobs for a premium look and touch. The Electric Cooktop offers the flexibility of four burners of varying size and power, all with a sleek, frameless design.

24" Pull-Out Visor Hood

Sleek in design, the Pull-Out Visor Hood uses a powerful 400 CFM blower to quickly freshen the air in the kitchen. And since compact kitchens aren't conducive to appliances that protrude into open space, the hood stores neatly inside the unit when the ventilation is not in use.

24" Wall Oven and 24" Speed Oven

Offering genuine European convection for even baking, the Bosch 24" Wall Oven features 10 cooking modes and two levels of broiling. And the eco-friendly DualClean® system uses a catalytic coating and heat to clean the oven during the cooking process. The 24" speed oven pairs the cooking qualities of a conventional oven with the speed of a microwave, designed for smaller spaces.

18" Dishwashers

Bosch 18" Dishwashers feature key innovations such as a third rack, a RackMatic® height adjustment system and a built-in water softener. 18" Dishwashers are ADA compliant and are available in a variety of handle options such as bar, recessed and custom panel ready options.

24" Refrigerators

Three options are available, and they all fit small spaces with cool sophistication. The 500 Series Stainless Steel Refrigerator and the Glass Door Refrigerators have been named ENERGY STAR's Most Efficient for 2016, offering greater efficiency with features such as beautiful LED lighting. Showcasing a luxury look, the exclusive 24" Glass Door Refrigerator is available in black, white or glass-on-stainless steel.

24" Compact Laundry

Small goes beyond the kitchen, too. Offering European style and uncompromising German-engineered reliability, Bosch 24" Compact Washers and Dryers deliver quieter performance and improved efficiency. The 500 and 800 Series laundry pairs are ENERGY STAR® qualified. To keep footprints minimal, the laundry pair can be installed stacked, side-by-side, under counter or on pedestals. And with no venting required for the dryer, the models can be placed almost anywhere in the home.
